SUMMIT SPECIALTY INTERNATIONAL LLC

Knotty Pine

Knotty pine doors are a timeless classic exhibiting the natural beauty of solid pine wood. The light color of the knotty pine interior doors makes them an excellent choice for many color schemes and design styles. Rustic and country interiors as well as traditional settings benefit from the knotty pine door.

Benefits of Primed Doors

- *No raised wood grain when painting – smoother finish*
- *No veneer bubbles from water-based paints on primed doors*
- *MDF stile and rail veneers are a much harder surface than pine and less susceptible to dents or damage*
- *Can use water-based top coat on primed doors*

Barn Door / Knotty Pine U-Groove

We offer the rustic look of Knotty Pine, the traditional look of Clear Pine and the more contemporary look of the Primed flat panel shakers. Primed doors can be painted to match any color scheme. Barn Doors are available in a number of patterns

Louver

Louver doors provide superior air flow allowing warm or cool air to travel between rooms, even when the door is shut. Good for closets so that air does not become stale around clothing, blankets or toiletries.

Better ventilation for utility closets and for rooms where moisture accumulates (mud rooms, basement areas, etc.)

Finishing Instructions

- Remove door from frame and lay flat for best performance.
- Sand the entire door lightly, using #180 grit sand paper (heavy veneers). Always sand in direction of the grain.
- Thoroughly remove all dust prior to applying finish. A tack cloth is recommended - be sure to follow tack cloth manufacturers instructions.
- **DO NOT USE** COMPRESSED AIR to blow off door as moisture in air will cause water spotting on stained finishes.

Painting Doors

- **SELECT A HIGH-QUALITY OIL BASED PIGMENTED PRIMER** (water based finishes may raise grain).
- **DO NOT USE WATER BASED PRIMER OR PAINT. WATER BASED FINISHES WILL VOID ALL WARRANTIES.** An exterior grade paint must be used on all exterior doors. Cover all surfaces evenly.
- **BE SURE TO SEAL TOP AND BOTTOM** of doors as well as all sides.
- **APPLY A MINIMUM OF TWO TOP COATS** - sanding between coats. For glazed doors, allow top coat to lap onto glass 1/16" to protect from moisture.
- **DO NOT USE BLACK OR DARK COLORED TOP COATS** on doors that will be exposed to direct sunlight for extended periods of time throughout the daylight hours.

Staining Doors

- Use a recommended OIL BASED prestain or conditioner prior to staining. Apply OIL BASED semitransparent stain or clear under coat as recommended for exterior or interior application. Apply three coats of clear top coat varnish or polyurethane and lightly sand between coats. Exterior finishes must have Ultra Violet (UV) inhibitors. For glazed doors, allow top coat to lap onto glass to protect from moisture.

ONE YEAR LIMITED WARRANTY ON DOORS

Summit Specialty International LLC doors are warranted to be of sound material and workmanship and to be free of defects which would cause the door to be unfit for ordinary recommended use for the period of twelve months from the date of shipments provided the handling, installation and finishing instructions included in the packaging of each door are followed. A normal characteristic of kiln-dried wood is minor swelling and shrinking of parts made from wood. This may occur with variations in climactic and atmospheric conditions such as humidity and temperature and is not a defect hereunder. Natural variations in the color or texture of the wood are not considered defects. Warp in the plane of the door itself will be considered a defect only if it exceeds one-quarter inch (1/4") when measured as a deviation from a straight edge. Doors over 3-0 wide or 7-0 high are excluded from the warranty against warp. Improper hanging of the door or unsquare door frames is not considered as defects. Any doors found to be defective by the Seller will be repaired, replaced or purchase price will be refunded at the option of Summit Specialty International LLC provided the handling, installation and finishing instructions have been followed and written notice of a defect covered by the limited warranty has been given to Summit Specialty International LLC within the one year warranty period. An extended warranty period is granted solely for seal failure on insulated glass units (moisture between glass) for a period of ten (10) years from the date of manufacture. At Seller's sole discretion, the replacement door or glass will be shipped FOB Summit factory. Seller will not, under any circumstances, be liable for installation, refinishing or painting. Cracked or broken glass is not covered by this warranty. The glass warranty will be void if the product is not properly installed according to Seller's installation instructions, or is used in or around swimming pools, saunas or greenhouse enclosures: or, if installed over 5,000 ft. above sea level unless units were ordered with high altitude breather tubes. No agent, employee or representative of Seller has any authority to bind Seller to any affirmation, representation or warranty concerning Sellers' products, except as expressly stated herein. The foregoing is in lieu of all other expressed warranties. All implied warranties, including the implied warranties of merchantability or fitness for a particular purpose, are hereby limited in duration to the one-year period stated herein. The liability of Summit Specialty Internationals LLC is expressly limited to the replacing or the repairing the defects of the door, or refunding at its option. Summit Specialty International LLC will not be liable for any other expense, injury, loss or damage, whether direct or consequential, arising in connection with the sale or use of or inability to use, any product of Summit Specialty International LLC, for any purpose. No purchaser shall be entitled to consequential damages as defined in the Uniform Commercial Code. Final determination of whether or not a defect exists shall be made solely by Seller in accordance with procedures established by Seller.
